

CPE 353 Lab007

Goals

Practice using the following elements of Qt and software engineering concepts

- Drag-and-Drop
- Event Handling
- **Object-Oriented Analysis and Design Concepts**
 - Use of inheritance to customize existing widget class
 - Reimplementation of inherited event handlers

Directions

Use **Qt Creator** to implement your own version of the Lab007 program.

Type the following while logged into **blackhawk** or a Linux lab machines to execute the sample solution.

`/home/work/cpe353/labs/lab007`

A video discussing the solution is available via Canvas.

If you have questions, please contact the course instructor.
